TELL
THE
TRUTH

WHY ARE WE HERE?

We are here to protest the destruction of humanity's life support system, the Earth.

If we continue to ignore the current crisis, we will face an unprecedented level of disruption within our lifetimes:

~ loss of pollinators and food system destabilization
~ more violent storms and deadlier heat waves
~ increased illness and death from air pollution
~ loss of infrastructure and displacement of entire communities as sea levels rise in NYC

Our City Council is refusing to act boldly – and we demand to be heard.

A sea wall is a start, but we should be investing equally in reducing our city's carbon output. NYC has the guts, technology, and innovative spirit to create solutions – now we need the political will.

We act in peace, with the fierce love of this city in our hearts. We apologize for the disruption, but can no longer allow business to continue as usual.

And we call on NYC today to provide a sustainable future for *all* of its residents.

WILL YOU JOIN US?
